

# SUDOSCAN<sup>+</sup>

EVALUATION OF DIABETES COMPLICATIONS

PERIPHERAL NEUROPATHY  
CARDIAC AUTONOMIC NEUROPATHY  
NEPHROPATHY

## CLINICALLY PROVEN

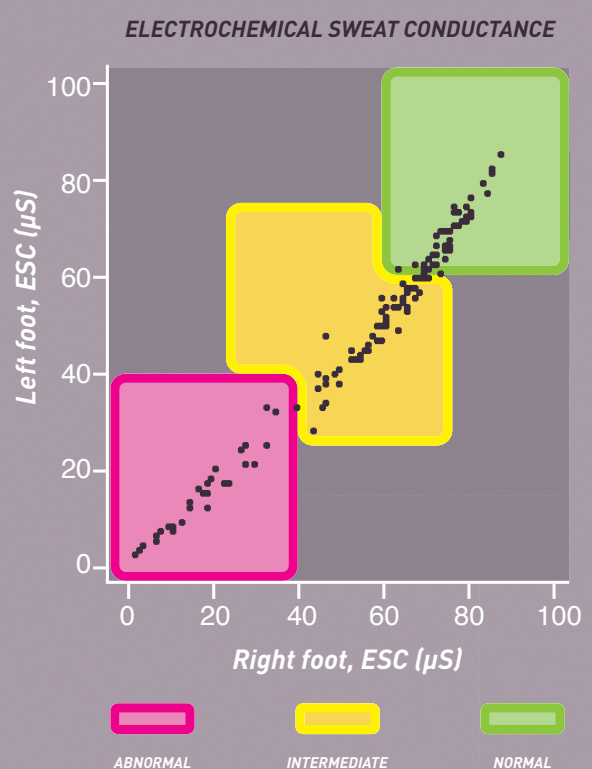

- > Reproducible
- > Sensitive
- > Complementary to HbA<sub>1c</sub>

## FAST AND PRACTICAL

- > 2-minute test
- > Requires minimal training
- > Results displayed immediately on screen

## EASY FOLLOW-UP

- > Quantitative results
- > Avoids patient subjectivity
- > Patient friendly

# EZSCAN

EARLY SCREENING AND PREVENTION OF  
CARDIOMETABOLIC RISK

## CLINICALLY VALIDATED

- > Higher sensitivity than FPG, OGTT and HbA<sub>1c</sub>
- > Correlation with V<sub>O</sub><sub>2</sub> max and HRV
- > Correlation with Insulin sensitivity

## FAST

- > No blood draw
- > No fasting
- > Result in 2 minutes

## EFFICIENT

- > Any time testing
- > High throughput
- > Low cost operation
